SUMMARY

PhD student in Computer Engineering at the University of Houston seeking a **Summer 2026 AI/ML Research Internship**. Research focuses on **trustworthy AI, explainable AI, computer vision, multimodal learning, medical image analysis, visual grounding**, and **human-centered AI**.

SKILLS

Programming: Python, SQL, Bash

Machine Learning: PyTorch, Deep Learning, Computer Vision, Image Segmentation, Object Detection, Explainable AI, Weakly Supervised Learning

Multimodal AI: Vision-Language Models, Visual Grounding, Medical Image Analysis, Gaze Modeling, Agentic AI

Data and Infrastructure: BigQuery, Apache Airflow, Google Apps Script, Git, Linux

EDUCATION

PhD in Computer Engineering

Aug 2024 – Present

University of Houston, USA

Topic: AI in Medicine; Focus: Computational Pathology, Trustworthy AI, Gaze-Guided Explainability

MSc in Mathematical Foundations of Computer Science (Data Science)

Vietnam National University – Ho Chi Minh City, Vietnam GPA 8.97/10

Bachelor of Business Administration

University of Economics and Law, Ho Chi Minh City, Vietnam

EXPERIENCE

Research Assistant

Aug 2024 – Present

Department of Computer Engineering, University of Houston, USA

Supervisor: Prof. Hien Van Nguyen

- Develop explainable AI and computer vision methods for whole-slide pathology image analysis using deep learning, weakly supervised learning, visual grounding, and model attribution.
- Build multimodal AI models that integrate medical images, clinical text, and eye-gaze data to align model reasoning with expert diagnostic behavior.
- Implement research pipelines in Python and PyTorch for image segmentation, feature attribution, prototype learning, and multimodal representation learning.
- Published first-author papers at WACV 2026, ISBI 2026, and MIDL 2026; contributed to MICCAI 2025, Scientific Reports, and Knowledge-Based Systems.

Research Assistant - Research Internship (NSTC Scholarship Program, Taiwan)

Oct 2023 – Jan 2024

National Cheng Kung University - BME Lab (Cancer Organoid Research)

Supervisor: Prof. Ting-Yuan Tu

- Applied deep learning and computer vision methods in a biomedical engineering lab to analyze functional behavior in human cardiac organoids, enabling real-time quantification of contraction dynamics from microscopy videos.

Senior Data Analyst, Machine Learning Focus

Jan 2019 – Oct 2022

Tiki Corporation, Vietnam

- Designed and deployed production recommendation systems using collaborative filtering, content-based models, and hybrid machine learning approaches.
- Built scalable end-to-end data and ML pipelines using Python, SQL, BigQuery, and Apache Airflow.
- Evaluated machine learning models and product changes through A/B testing, performance monitoring, and business metric analysis.
- Led data-driven modeling projects involving customer segmentation, clustering, predictive analytics, and automated reporting.

GHN Logistics, Vietnam

- Developed data warehouses, automated reporting systems, and analytical dashboards using Python, SQL, and Google Apps Script.

AWARDS & SELECTED MENTIONS

- MICCAI FLARE Challenge 2025 Finalist with Honorable Award. [Cert]
- AI Challenge 2023, National Video Retrieval Competition, Finalist.
- Featured by **Tuoi Tre**, a leading Vietnamese newspaper, in a story about my academic journey and research interests in AI for medicine, Oct 2025.
